

FINAL PHASE OF THE GARY 5.0 PROJECT

We are beginning a crucial phase of quality validation for the GARY 5.0 platform. The pilot results will serve as a benchmark for the project's quality before its widespread rollout.

THE THREE MAIN GOALS OF THE PILOTING PHASE:

- Assessment – We verify that the platform, modules, and exercises are functional and run smoothly.
- Quality Verification – We ensure that the content is clear, engaging, and valuable to learners, trainers, and professionals.
- Feedback – We gather feedback to identify what works best and what needs improvement in the Industry 5.0 Benchmarking Tool

TOPICS OF THE MODULES THAT WE WILL PILOT

- Competences and resources necessary for the transformation to Industry 5.0 at the local level
- Regenerative, circular economy approaches as framework for Industry 5.0 implementation
- Interactions between man and machine as the basis of economics at every level
- Simulation models and digital twins as the basis for production planning
- Virtual reality as experiential-based tools to growth

LAST TRANSNATIONAL PARTNER MEETING IN TALLINN

Partners from Germany, Estonia, Portugal, Italy and Poland met for the last time in Tallinn, Estonia, hosted by the Estonian partner Eesti EduHub.

We have discussed the final steps of the project, such as the external piloting of project results, dissemination, exploitation and sustainability of the project, as well as the reporting duties to the German National Agency.
